

University College Hospital Pancreaticobiliary New Patient Referral

Please email back to the sender : UCLH.HPBmedicine@nhs.net

Dedicated PB referral line: 07939204237 (within office hours)

DATE:

PATIENT DETAILS: Essential for UCH registration

Name	
DOB	
Address	
Phone Numbers (inc mobile please)	
GP and Practise	

NHS number <small>essential otherwise case can't be done</small>	
Consultant	
Hospital	
Ward	
Contact name and number of referrer <small>(mobile preferable)</small>	

CLINICAL DETAILS and details of IMAGING (stretch the box to add details)

Many cases are done with anaesthetic support, so the following information is crucial

PAST MEDICAL HISTORY (see anaesthetic notes page 2)

Cardio	Resp	Endocrine	Neuro	Haem	GI

PAST SURGICAL HISTORY (inc previous GAS) stretch the text box if required

MEDICATIONS and ALLERGIES (especially warfarin / heparin / clopidogrel / aspirin)

Cardiology MI/Angina Hypertension Pacemaker/AICD Coronary stent Valve disease	Respiratory COPD/Bronchitis Asthma TB Sleep apnoea	Neurological Epilepsy/FITS CVA/TIA/Stroke Muscle disease Arthritis
Endocrine/Renal Diabetes Thyroid disease Kidney disease	GI Acid reflux/Indigestion Hiatus hernia Stomach ulcer Bowel problems Liver disease	Haematology Anaemia DVT/PE/Blood clots Blood disorders

BLOODS (all essential): **Date**

Coag		ALT	
Platelets		GGT	
Hb		CRP	
WCC		Na	
Platelets		K	
Bilirubin		Urea	
ALP		Creat	

Important features of Past Medical History for Anaesthetic Risk – mark with a 'Y'

Further Anaesthetic requirements:

- **ALL OVER 50 YEAR OLDS SHOULD ATTEND UCH WITH A RECENT ECG**
- **THE PATIENT SHOULD ATTEND UCH WITH ORIGINAL HOSPITAL NOTES FROM REFERRING HOSPITAL OR COPY OF NOTES**

Cardiology

Pacemakers need checking by a technician before procedure.

Patients with moderate to severe heart disease need assessment by a cardiologist and an up to date echocardiogram if possible

Respiratory

Patients with moderate to severe disease need lung function tests: spirometry & peak flow rate.

Neurological

Patients with a significant history of recurrent TIA/CVA need a Doppler of the carotids.

Endocrine

Patients with thyroid disease need thyroid function tests.

The assessments and tests should have been done within the last 6 months (or within a year is acceptable if the condition has been stable).

A written report of the tests and assessments should accompany the patient.

NB significant disease means disease which interfere with daily living activities
