

Meeting of the *London Cancer CUP Subgroup*

Date: **May 16th 2017, 15:00-16:30**

Venue: 6th floor east, 250 Euston Road, London, NW1 2PG

Chair: **Roopinder Gillmore**

1. Welcome and introductions and minutes from last meeting

- RG welcomed members of the subgroup, introductions were made and apologies heard.
- Minutes agreed as true record excepting that Louise Dulley was in attendance which was not recorded.

Actions:

RG and KKS to form a working group to revisit two week wait form for CUP – updated as Zara Gross from TCST leading this. First meeting to take place Thursday 8th June 9.30am. Contact: zaragross@nhs.net

Bonnie Chrysanthou (TCST) to circulate list of CNS' and CUP leads with a request for alterations to be made and a preference in point of contact identified. – updated as RG now leading this. Suggested that the list of leads and CNSs should be included as part of the minutes / agenda for meetings and kept up to date.

2. CUP referral pathway

- Trusts described how GPs currently refer to CUP services.
- CUP teams are happy to accept referrals if there is abnormal imaging.
- At BHRUT a phonecall is made to the CUP CNS.
- At Royal Free patients any patients referred via 2 week wait to gastro on basis of abnormal imaging are triaged to the CUP team
- At Barts there is an agreed algorithm for each presentation eg liver mets to gastroenterology, bone mets to orthopaedics.
- The group felt that the 2ww referral form would need to be in place and adopted London Cancer wide before making any changes to the individual pathways.

3. Review of CUP guidelines

- RG had circulated updated guidelines. There was a discussion about chemotherapy regimens.
- DF made comments about palliative care in relation to the ASCO consensus statement 2017.
- RG to make changes as discussed and recirculate with a window for final comments. After this time the guidelines will be uploaded on the *London Cancer* website.

ACTION: RG to incorporate comments as discussed at today's MDT and then circulate to CUP MDT Leads. Deadline to be set for all comments and then to be approved and adopted by <i>London Cancer</i>
--

4. AOB - Trials and biobanking

- Information had been circulated: biobanking consent form and patient information sheet, information relating to the PEACE trial Biobanking – foundation testing will soon be available and biobanking will enable this.
- The StarTrk trial is open (Sarah Cannon Research Institute).

- The PEACE trial permits a post mortem study. There was a discussion about the inclusion of hospices which should be explored. Barriers to taking part in this trial are namely acceptability and the need for a signed up pathologist. Patients can be referred to UCH for consideration of participation in this trial
- There was a question about whether this trial would allow information on the primary cancer to be fed back to patient families but this is unlikely.
- Members of the group to contact Dr Mariam Jamal-Hanjani if they would like to explore taking samples in their Trust.

ACTION: JB to feed back comments from the group to Dr Mariam Jamal-Hanjani

Network event

The group suggested having a network day in October 2017 with an educational component in the afternoon including patient information and more informal networking in the early evening. It was felt that a Wednesday, Thursday or Friday would be the best day. HS to include in email with minutes asking for suggestions.

ACTION: HS to send email round the group for ideas for network event

5. Next Meeting

Tuesday 26th September 2017, 15:00-16:00, 250 Euston Road 6th Floor (East) Meeting Room.

ACTION LOG

Action	Owner	Date Agreed	Status
	RG/KKS	22/11/2016	Ongoing
